PROFILE

Business analyst and implementation engineer with 2 years of experience across core banking delivery, government system documentation and front-end application support. I author functional specifications, configure and test financing modules, investigate production defects in Oracle and PL/SQL, and run requirement sessions with client finance, operations and IT teams. Seeking a project delivery, application maintenance or business development role in banking or enterprise software.

PROFESSIONAL EXPERIENCE

May 2026 – Sep 2026	<u>Professional Services Engineer</u>, JurisTech Sdn Bhd – Kuala Lumpur • Deliver and maintain modules on a core banking and lending platform for banking and financial services clients, running four concurrent implementation, enhancement and maintenance engagements. • Author and version-control Functional Specification Documents and system interface specifications. Run requirement sessions with client finance and operations stakeholders, issue minutes of meeting, and carry tracked-change amendments through joint review to sign-off. • Configure General Ledger mappings and financing modules, then test them against the platform financing APIs with documented test evidence. • Investigate and fix production defects: GL mis-postings, late batch runs that left GL files missing, e-Invoice submission rejections, and revenue recognition errors on early loan closure. Deliver remediation scripts in Oracle SQL and PL/SQL, deployed through Git-based release workflows. • Prepare client-facing impact assessments, walkthrough scripts and stakeholder Q&A briefings, surfacing gaps that convert into scoped follow-on enhancements. Projects involved: • OSK • Maybank • ACOM
Dec 2025 – May 2026	<u>System Analyst (Contract)</u>, GeoInfo Services Sdn Bhd – Seri Kembangan, Selangor • Supported development and implementation of web-based systems and front-end applications for government and commercial clients. • Worked with developers and stakeholders to check that proposed solutions met the business need and were technically feasible. • Contributed to system improvements, UI/UX changes and process optimisation. Projects involved: • GeoSeremban • Sime Darby • Taiping municipal initiatives
Feb 2025 – Jul 2025	<u>System Analyst, Protégé Programme</u>, HeiTech Padu Berhad – Cyberjaya, Selangor • Worked on NIISe, a national government system, contributing to solution design, development and implementation. • Prepared the core system documentation: User Requirement Specification (URS), Software Requirement Specification (SRS), Software Design Document (SDD) and User Acceptance Testing (UAT) plans. • Gathered and analysed business needs with stakeholders so that system functions matched the project objectives.
Sep 2024 – Feb 2025	<u>Intern, Construction & Fabrication (GPD/PD&T)</u>, PETRONAS – KLCC, Kuala Lumpur • Built GoldFinger, a Power BI dashboard that tracks welder deployment across PETRONAS projects. • Built a DCF Budget Tracker dashboard in Power BI for monthly budget tracking.

- Rebuilt the Productivity Calculator interface in PowerApps with JavaScript, for integration into the ProTracks solution.
- Helped run department events (CDD Stakeholders Engagement, CDD Olympic Games, CDD Townhall 2025) and produced the department year-end montages.

EDUCATION

Graduated Feb 2025	<u>Bachelor of Information Systems (Hons.) Information Systems Engineering,</u> MARA University of Technology (UiTM) – Shah Alam
	• CGPA 3.26, Second Class Upper Honours. • Thesis: Event Photography Booking System.
Graduated May 2021	<u>Science Stream Matriculation,</u> Selangor Matriculation College – Selangor
	• CGPA 3.00.

CERTIFICATIONS

- Oracle Database Certification: Oracle database architecture, SQL, PL/SQL and database administration.
- MySQL Database Certification: database design, SQL queries, database management and MySQL Workbench.
